HOW DO I START MY OWN ESTES ROCKET FLEET?

The best way to begin model rocketry is with an Estes flying model rocket Starter Set or Launch Set. You can either start with a Ready To Fly Starter Set or Launch Set, that has a fully constructed model rocket, or an E2X® Starter Set or Launch Set that requires assembly prior to launching. Both types of sets come complete with an electrical launch controller, adjustable launch pad, flight supplies and an information booklet to get you out and flying in no time. Starter Sets include engines, Launch Sets let you choose your own engines (not included). You'll need four "AA" alkaline batteries and perhaps glue, depending on which set you select.

HOW EASY AND HOW MUCH TIME DOES IT TAKE TO BUILD MY ROCKETS?

Estes model rocket kits range from ready to fly in just minutes to those that provide many enjoyable hours of building fun. Estes kits are classified into five categories.

READY TO FLY (RTF): No paint, glue or modeling skills required. Rocket comes assembled and is ready for liftoff in just minutes.

E2X® ROCKET KITS: No paint or special tools needed. E2X® kits contain parts that are colored and easy to assemble. Simply glue the parts together as per the instructions, apply the self-adhesive decals, attach the recovery system and you are ready to blast off! Assembly takes as little as 1 hour.

SKILL LEVEL 1 ROCKET KITS: Requires some painting, gluing and sanding. Features die cut balsa fins, slotted body tubes, plastic nose cones and self-adhesive decals. Step by step instructions make building very easy. Assembly takes at least an afternoon.

SKILL LEVEL 2 ROCKET KITS: First tier of more advanced kits. Requires beginner skills in model rocket construction and finishing. Features die cut or laser cut balsa or plastic fins, plastic nose cones and unfinished body tubes. Assembly time may take a complete day.

SKILL LEVEL 3 ROCKET KITS: Second tier of more advanced kits. Requires moderate skills in model rocket construction and finishing. Features multiple die cut or laser cut balsa fins and parts, unfinished body tubes, complex designs and plastic nose cones. Assembly time may take a couple of days.

HOW DO ESTES MODEL ROCKETS WORK?

Estes model rockets are activity kits designed of lightweight materials such as paper tubing, balsa wood and plastic. Balsa or plastic fins are glued to the body tube for guidance and stability. A model rocket engine holder is also part of the rocket to keep the engine in place during thrust.

Estes was the first to develop a mass-produced model rocket engine and has produced the engines for over 45 years. The Estes model rocket is propelled into the air by an electrically ignited model rocket engine. After its acceleration, the rocket continues upward emitting tracking smoke as it coasts. At the rocket's peak altitude (also called apogee), a recovery device, such as a plastic parachute or streamer, is deployed to return the rocket gently to earth. The rocket can then be prepared for another flight.

WHERE DO I FLY ESTES MODEL ROCKETS?

The chart on page 5 tells you what size field to use for each size engine. Each engine size is designated by a letter and is up to twice as powerful as the letter before it. See the engine section (pages 34-36) of this catalog for more information.

HOW DID IT ALL GET STARTED?

In the mid-1950's when the space age began, flying rockets became very popular. However, there were no safe propellants readily available to launch rockets. In 1958 Vernon Estes developed the first safe mass-produced model rocket engine. The Estes rocket engine was destined to make model rocketry one of the most popular outdoor activities enjoyed today. Estes products have changed with the times and you can see all the exciting rockets, planes and specialty items in this catalog or on the web @ www.estesrockets.com.

WHAT DO I NEED TO KNOW?

In this catalog, each description lists important INFORMATION:

- Something fun about the rocket.
- Specifications - how tall, wide and heavy.
- What engines we recommend.
- How high, on the largest engine recommended, the rocket flies (in feet and in meters).
Maximum altitudes are projections only, your rocket's actual performance may vary.
- The sort of recovery system that brings the rocket back - parachute, streamer or other.
- The type of fin material - plastic, balsa or card stock.

Remember - Estes model rocket kits offer you a wide spectrum of building and flying. Best of all, they are all fun!

Model rocket kits are constructed of lightweight materials such as paper, balsa and plastic. This diagram shows how parts fit together. Nearly all Estes parts that have the same series description number fit together. For instance, a BT-20 body tube will fit a NC-20 nose cone. An AR2050 centering ring will center a BT-20 into a BT-50.

PLEASE READ: IMPORTANT STUFF!

Estes model rocketry is recommended for ages 10 years and up. Adult supervision is recommended for those under 12 years of age. Unless otherwise specified all models require assembly. Engines, launch system, glue and finishing supplies are not included with model rocket kits unless specified otherwise.

USE ONLY WITH ESTES PRODUCTS

Caution: Use of any Estes product with any other brand-name rocket product containing any defect or causing any damage may void the Estes warranty.

WARRANTY

Your Estes product is warranted against defects in materials or workmanship for a period from the date of original purchase. Any Estes product, which, because of a manufacturing mistake, malfunctions or proves to be defective within the period noted in the warranty provided with the product will be repaired or replaced, at Estes' option and at no charge to you, provided it is returned to Estes with proof of purchase.

This warranty does not cover incidental or consequential damage to persons or property caused by the use, abuse, misuse, failure to comply with operating instructions or improper storage of the warranted products. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

For repair or replacement under this warranty, please return the defective part of your Estes product with proof of purchase to: Estes Industries, Customer Service Department, 1295 H Street, Penrose, Colorado 81240. Tel. 719-372-6565 Fax 719-372-3419.

N.A.R.* MODEL ROCKET SAFETY CODE

Effective February 10, 2001

1. MATERIALS. I will use only lightweight, non-metal parts for the nose, body, and fins of my rocket.

2. MOTORS. I will use only certified, commercially-made model rocket motors, and will not tamper with these motors or use them for any purposes except those recommended by the manufacturer.

3. IGNITION SYSTEM. I will launch my rockets with an electrical launch system and electrical motor igniters. My launch system will have a safety interlock in series with the launch switch, and will use a launch switch that returns to the "off" position when released.

4. MISFIRES. If my rocket does not launch when I press the button of my electrical launch system, I will remove the launcher's safety interlock or disconnect its battery, and will wait 60 seconds after the last launch attempt before allowing anyone to approach the rocket.

5. LAUNCH SAFETY. I will use a countdown before launch, and will ensure that everyone is paying attention and is a safe distance of at least 15 feet (4.6 m) away when I launch rockets with D motors or smaller, and 30 feet (9 m) when I launch larger rockets. If I am uncertain about the safety or stability of an untested rocket, I will check the stability before flight and will fly it only after warning spectators and clearing them away to a safe distance.

6. LAUNCHER. I will launch my rocket from a launch rod, tower, or rail that is pointed to within 30 degrees of vertical to ensure that the rocket flies nearly straight up, and I will use a blast deflector to prevent the motor's exhaust from hitting the ground. To prevent accidental eye injury, I will place the launcher so that the end of the launch rod is above eye level or will cap the end of the rod when it is not in use.

As a member of the Estes Model Rocketry Program, I promise to faithfully follow all rules of safe conduct as established in the above code.

Signature _____

Important Note: "G" engines must be sold to and used by adults (18 and up) only.

To launch large model rockets weighing more than one lb. (453 g) including propellant or rockets containing more than 4 oz. (113 g) but no more than 4.4 oz. (125 g) of propellant (net weight), you must notify and perhaps obtain authorization from the Federal Aviation Administration (FAA). Check your telephone directory for the office nearest you or contact Estes Industries for further information.

*National Association of Rocketry

7. SIZE. My model rocket will not weigh more than 53 ounces (1500 grams) at liftoff and will not contain more than 4.4 ounces (125 grams) of propellant or 71.9 pound-seconds (320 N-sec) of total impulse. If my model rocket weighs more than one pound (453 grams) at liftoff or has more than 4 ounces (113 grams) of propellant, I will check and comply with Federal Aviation Administration regulations before flying.

8. FLIGHT SAFETY. I will not launch my rocket at targets, into clouds, or near airplanes, and will not put any flammable or explosive payload in my rocket.

9. LAUNCH SITE. I will launch my rocket outdoors, in an open area at least as large as shown in the accompanying table, and in safe weather conditions with wind speeds no greater than 20 miles per hour (32 km/h). I will ensure that there is no dry grass close to the launch pad, and that the launch site does not present risk of grass fires.

LAUNCH SITE DIMENSIONS

Installed Total Impulse	Equivalent Motor Type	Minimum Site Dimensions	
		Feet	Meters
.00 - 1.25	1/4A, 1/2A	50	15
1.26 - 2.50	A	100	30
2.51 - 5.00	B	200	60
5.01 - 10.00	C	400	120
10.01 - 20.00	D	500	150
20.01 - 40.00	E	1,000	300
40.01 - 80.00	F	1,000	300
80.01 - 160.00	G	1,000	300
160.01 - 320.00	Two G's	1,500	450

10. RECOVERY SYSTEM. I will use a recovery system such as a streamer or parachute in my rocket so that it returns safely and undamaged and can be flown again, and I will use only flame-resistant or fireproof recovery system wadding in my rocket.

11. RECOVERY SAFETY. I will not attempt to recover my rocket from power lines, tall trees, or other dangerous places.

RTF STARTER SETS

1434 MAX TRAX®

\$44.99

Track how high this rocket flies. The Max Trax® features an electronic altitude-tracking capsule that automatically calculates and displays how high the rocket traveled in feet and meters.

SPECS:

Length: 17 in. (43.2 cm)

Dia.: 1.35 in. (34.3 mm)

Wt.: 2.6 oz. (73.9 g)

Recovery: Rocket - 12 in. (30 cm) Parachute; Capsule - Streamer

Fins: Plastic molded

Max. Altitude: 600 ft. (183 m)

Recommended Engines: B4-2, B6-2, B6-4, C6-3, C6-5
(Includes two engines)

1825 PATRIOT™

\$33.99

The Patriot™ dominates the skies. This classic scale-like model rocket is built ready-to-fly and looks like the genuine surface-air defense missile used by the U.S. Army.

SPECS:

Length: 18.0 in. (46 cm)

Dia.: 1.35 in. (34.3 mm)

Wt.: 2.7 oz. (75 g)

Fins: Plastic molded

Max. Altitude: 600 ft. (183 m)

Recommended Engines: A8-3, B4-4, B6-4, C6-5
(Includes two engines)

1827 NSA STARSHIP™

\$33.99

"Penrose, we have liftoff!" Explore new worlds with the NSA Starship™. Like those launched at the cape, this ready-to-fly model rocket soars high into the sky then deploys a parachute to return to earth.

SPECS:

Length: 18.0 in. (46 cm)

Dia.: 1.35 in. (34.3 mm)

Wt.: 2.7 oz. (75 g)

Recovery: 12 in. (30 cm) Parachute

Fins: Plastic molded

Max. Altitude: 600 ft. (183 m)

Recommended Engines: A8-3, B4-4, B6-4, C6-5
(Includes two engines)

1848 SNAPSHOT™

\$44.99

Take fantastic photos from 500 feet high! The Snapshot™ camera rocket is factory assembled and ready to launch. Includes a FREE roll of Kodak® 110 color print film. Film developing available locally.

SPECS:

Length: 18.0 in. (46 cm)

Dia.: 1.35 in. (34.3 mm)

Wt.: 3 oz. (86.2 g)

Recovery: 12 in. (30 cm) Parachute

Fins: Plastic molded

Max. Altitude: 500 ft. (152 m)

Recommended Engine: C6-5 ONLY
(Includes two engines)

1889 SPEED FREAK™

\$44.99

How FAST does your rocket fly? Track the speed of the Speed Freak™ using the 'Advanced Velocity Tracking Technology' capsule. The capsule contains a digital speedometer that records the speed of your rocket, flight after flight.

SPECS:

Length: 17 in. (43.2 cm)

Dia.: 1.35 in. (34.3 mm)

Wt.: 2.61 oz. (74 g)

Recovery: Rocket - 12 in. (30 cm) Parachute; Capsule - Streamer

Fins: Plastic molded

Max. Altitude: 600 ft. (183 m)

Recommended Engines: B4-2, B6-2, B6-4, C6-3, C6-5

The Estes ETM Controller (#2230) is recommended to launch this two-engine cluster - sold separately.

2123 EGGSCALIBER™

\$16.99

The only rocket that lets you launch eggs on four different engines sizes using the same rocket! Eggscaliber™ includes a special engine adapter to launch an egg on B & C engines or remove it to launch an egg on D and E engines. Its transparent capsule section also lets you see the egg before and after flights. We've also included a set of decals to decorate your egg into your favorite "eggstronaut".

SPECS: Length: 20 in. (51 cm)

Dia.: 1.35 in. (34.2 mm)

Wt. (without egg): 2.6 oz. (74 g)

Recovery: 12 in. (30 cm) Parachute and 18 in. (46 cm) Parachute;

Max. Altitude: 610 ft. (186 m)

Recommended Engines: With egg - B6-2, C6-3, C11-3, D12-3, E9-4; Without egg - B4-2, B6-2, C6-5, D12-5, E9-6.

Requires 3/16 in. (5 mm) Maxi™ launch rod (302244) - sold separately.

2179 GUARDIAN™

\$11.49

The Guardian™ rocket simulates a ground-to-air missile.

This multi-finned guardian of the sky soars over 700 ft. (213 m).

SPECS: Length: 19.13 in. (48.6 cm);

Dia.: 1.33 in. (33.8 mm);

Wt.: 2.4 oz. (68.6 g);

Recovery: 12 in. (30 cm) Parachute;

Fins: Die cut balsa;

Max. Altitude: 723 ft. (220 m);

Recommended Engines: A8-3, B4-4, B6-4, B6-6, C6-5

2190 COSMOS MARINER

\$31.19

The Estes Cosmos Mariner is a boosted glider version of the sleek X Prize rocket plane from the Lone Star Space Access team. The rocket plane blasts off 250 ft. into the air using a powerful "D" engine. Laser cut balsa parts. 1:67 scale.

SPECS:

Length: 18 in. (46 cm)

Wingspan: 13.5 in. (34.3 cm)

Dia.: 1.637 in. (41.6 mm)

Wt.: 8.6 oz. (243.6 g)

Recovery: Glide & 18 in. (46 cm) Parachute

Fins: Laser cut balsa

Max. Altitude: 250 ft. (76 m)

Recommended Engine: D12-3

Requires 3/16 in. (5 mm) Maxi™ Rod (302244) - sold separately.

2191 SPACESHIPONE™

\$17.49

The famous Scaled Composites X Prize winning spacecraft, designed by Burt Rutan. Based on the first privately manned spaceship to reach outer space. It blasts 400 feet into the air and uses an Estes B or C engine. Laser cut balsa parts. 1:30 scale.

SPECS:

Length: 13.0 in. (33 cm)

Wingspan: 6.5 in. (16.5 cm)

Dia.: 2.0 in. (50.8 mm)

Wt.: 3.0 oz. (85.0 g)

Recovery: 12 in. (30 cm) Parachute

Fins: Laser cut balsa

Max. Altitude: 400 ft. (122 m)

Recommended Engines: B4-2, B6-2, C6-3

2192 THUNDERSTAR

\$19.69

Designed by Starchaser Industries, the Thunderstar X Prize entry uses a cluster of two Estes engines to reach 1,000 feet in the air. At apogee, a fully assembled 18" parachute is deployed allowing for a safe recovery. Laser cut balsa parts. 1:41 scale.

SPECS:

Length: 26.5 in. (67.3 cm)

Dia.: 1.637 in. (41.6 mm)

Wt.: 2.75 oz. (78.1 g)

ESTES MODEL ROCKET ENGINES

The famous model rocket engines that made model rocketry the great activity it is today. Estes model rocket engines have been proven consistent and reliable in more than 315,000,000 launches.

- The concept of a factory assembled model rocket engine is the foundation of this scientific and educational activity!
- 3% of all Estes engines are static-tested at the factory for reliability and adherence to performance specifications.
- All engines comply with the code requirements of the National Fire Protection Association and are certified by the National Association of Rocketry.

HOW DOES A MODEL ROCKET ENGINE WORK?

1. When engine is ignited, it produces thrust and boosts rocket into sky.
2. After propellant is used up, delay is activated, producing tracking smoke and allowing rocket to coast.
3. After delay, ejection charge is activated, deploying recovery system.

WHAT SIZES ARE AVAILABLE?

Estes engines are available in a wide variety of sizes and power levels:

TYPE	TOTAL IMPULSE	ENGINE TYPES
1/4A	0.313 - 0.625	Mini
1/2A	0.626 - 1.25	Standard, Mini
A	1.26 - 2.50	Standard, Mini
B	2.51 - 5.00	Standard
C6	5.01 - 10.00	Standard
C11	5.01 - 10.00	"D" Size
D	10.01 - 20.00	"D" Size
E	20.01 - 30.00	"E" Size

WHAT DO THE DIFFERENT COLOR ENGINES MEAN?

Each type of engine is printed in a different color:

- Single Stage** - Green
- Upper Stage** - Purple (Upper stage engines can be used as single stage engines in lightweight rockets.)
- Booster** - Red (Booster engines contain no delay or ejection charge.)
- Plugged** - Blue (Plugged engines are used for R/C gliders and contain no delay or ejection charge.)

Each engine has a letter-number-number code. (e.g., B6-4)

Letter: B
Number: 6
Number: 4

B = TOTAL IMPULSE

This letter is the total power (in Newton-seconds) produced by the engine. Each succeeding letter has up to twice the total power as the previous letter. (Example: "B" engines have up to twice the power of "A" engines, which results in approximately twice the altitude the rocket will reach.)

6 = AVERAGE THRUST

This number shows the engine's average push or how fast the engine powers the rocket to go. The higher the number, the faster the speed. It is measured in Newtons (4.45 Newtons = 1 lb.).

4 = TIME DELAY

This number gives you the time delay in seconds between the end of the thrust phase and ignition of the ejection charge. Engine types ending in "0" have no time delay or ejection and are used for booster stages and special purposes only. Engines ending in "P" have no time delay or ejection charge and the forward end is "Plugged".

ENGINE CHART

- Delays have a tolerance of plus or minus 10% or 1 second, whichever is greater.
- All Estes engines come complete with igniters and patented igniter plugs (Pat. No. 5,410,966 and 5,509,354). The Estes Igniter Plug makes engine ignition extremely reliable.
- Do not fly a rocket/engine combination whose liftoff weight exceeds the recommended maximum liftoff weight.

MODEL ROCKET ACCESSORIES

1463 DESIGNER'S SPECIAL \$60.99
Contains parts to design and build 7-8 of your own rockets.

1672 BLAST-OFF® FLIGHT PACK \$54.99
Includes 6 each of A8-3, B6-4, C6-3, C6-5 engines, 30 igniters and 75 sheets of recovery wadding.

2230 E™ LAUNCH CONTROLLER \$31.99
Comes complete with safety key and 30 ft. (9 m) of cable. Requires 4 "AA" alkaline batteries - not included. Adult supervision is required for anyone under 18 when launching "E" engine powered rockets.

2238 PORTA-PAD® E LAUNCH PAD \$31.99
Quick assembly - no glue or tools required. Includes a 1/4 in. (6 mm) launch rod, but can accommodate a 3/16 in. (5 mm) Maxi™ launch rod - not included. Adult supervision is required for anyone under 18 when launching "E" engine powered rockets.

302215 PORTA-PAD® II LAUNCH PAD \$25.79
Quick assembly - no glue or tools required! Comes complete with blast deflector and standoff, two-piece 1/8 in. (3 mm) launch rod, safety cap and key. Porta-Pad® II can accommodate a 3/16 in. (5 mm) Maxi™ launch rod - not included.

302220 ELECTRON BEAM® LAUNCH CONTROLLER . . \$28.79
Launch controller comes complete with safety key and 17 ft. (5.2 m) of cable. Requires four "AA" alkaline batteries - not included.

302227 TUBE MARKING GUIDE \$10.29
Easy way to mark fin and launch lug placement lines. Also includes a fin gluing jig.

302232 ALTITRAK™ \$25.49
Measure altitude with this easy to use device. Follow the rocket in the sights to apogee, release the trigger to lock the reading.

302233 EMERGENCY REPAIR KIT \$12.49
Contains: shock cord mounts, tape rings, safety key, recovery wadding, 12 in. (30 cm) assembled parachute, shroud lines, launch lugs, shock cords and launch rod safety cap.

302241 BLAST DEFLECTOR PLATE \$5.59
Replaces that worn-out deflector.

302243 1/8 in. (3 mm) TWO-PIECE LAUNCH ROD . \$11.49
Replacement rod; ideal for most rockets.

302244 3/16 in. (5 mm) TWO-PIECE MAXI™ LAUNCH ROD . \$13.99
Launch rod with extra strength and length for larger rockets.
